GitHub: github.com/aishaahmed66

Summary

Full-Stack .NET Developer with practical experience in building web applications using C, ASP.NET Core, SQL Server, Angular, and Bootstrap. Trained through real-world projects at ITI, with a focus on clean code, responsive design, and user-centered functionality.

Education

Bachelor of Computer and Artificial Intelligence

2020 – 2024

Helwan University, Cairo, Egypt

Department: Information Systems

GPA: 3.08/4

Graduation Project: FixFlex (A+) A full-stack service marketplace platform for both web and mobile, where users can post service requests and providers can apply. The system includes real-time updates, authentication, and role-based navigation.

Experience

Full-Stack .NET Developer – ITI (Trainee)

Mar 2025 – Jul 2025

- Developed web apps using ASP.NET Core, MVC, and Web API.
- Built responsive UIs with Bootstrap and Angular.
- Worked with Entity Framework and SQL Server for database management.
- Practiced Agile methodologies in team-based projects.

Mobile App Developer – DEPI (Trainee)

Mar 2024 – Oct 2024

- 6-month intensive training in Flutter.
- Built multiple mobile apps and integrated RESTful APIs.
- Applied state management techniques and UX design practices.

Projects

Facebook Clone

HTML, CSS, JavaScript, LocalStorage, Fake API

Simulates Facebook layout and login system. Posts retrieved from a mock API. Fully responsive UI with client-side data storage.

Book Finder

Bootstrap, JavaScript (ES6+), Google Books API

Responsive web app to search books via Google Books API. Includes filtering, pagination, and rating display.
